CATALOG 31

JANUARY 2025

NEW FOR 2025

The popularity of red dot reflex sights on tactical shotguns is rapidly increasing. These sights are low-profile, enable quick target acquisition, and significantly speed up weapons training for law enforcement cadets and seasoned veterans.

In 2023 Mesa Tactical introduced SureShell shotgun carriers with integrated Trijicon RMR footprint mounts, as well as standalone RMR mounts, for the Benelli M2, the Benelli M4, Beretta 1301 and Beretta A300 shotguns. This year we've expanded the line to accommodate Aimpoint ACRO and compatible footprints.

Customers can look forward to more footprints and shotgun platform support later in 2025.

We continue to expand the Truckee forend product line with support for the Benelli M2 and Remington V3 shotguns. The Truckee forend for the Remington V3 can also be installed on the Remington Tac-13.

URBINO[®] TACTICAL STOCKS FOR SHOTGUNS

The primary feature of the Urbino tactical stock for shotguns is a reduced length of pull from typical factory stock lengths. The 12½ inch length of pull allows most shooters to point the shotgun straight ahead, especially when wearing body armor. The Urbino stock is renowned for its quality and utility, making it the standard factory fit for Beretta 1301 Tactical shotguns.

Urbino stocks are available with two options, so there are four SKUs for each supported platform:

- With or without an adjustable cheek riser to provide excellent cheek weld when using optics on the shotgun; and
- A standard rubber buttpad or a more comfortable Limbsaver gel pad.

Urbino stocks without a cheek riser cannot be retrofitted to accept a cheek riser, so customers who think they might need a cheek riser in the future should order the cheek riser version of the Urbino stock, and simply run the stock with the cheek riser in the lowest position.

The cheek riser is also the attachment point for the SureShell carriers that mount to the Urbino stock.

TELESCOPING STOCK & ADAPTER KITS FOR SHOTGUNS

Mesa Tactical AR-15 stock adapters for shotguns allow factory shotgun stocks to be replaced with AR-15 carbine stocks. With a multi-position receiver extension tube, the overall length of the shotgun can be adjusted to accommodate shooters of different sizes and statures.

HIGH-TUBE® STOCK ADAPTERS & KITS

The High-tube adapter for the Remington 870 shotgun more closely resembles the geometry of the AR-15 rifle, and requires a rail-mounted optic. The comb height matches AR-15 specifications for proper cheek weld and sight alignment. Most kits include 9½-inch Picatinny top rail.

Telescoping stock kits come in several configurations:

- You can purchase the Stock Adapter only, and supply your own AR-15 grip and buttstock assembly.
- The Stock Kit is complete out of the box, with a Mesatac Trego grip and an M4 Carbine buttstock. Stock kits will include a mil-spec AR-15 receiver extension tube, or a Kynshot hydraulic recoil absorbing buffer.
- The Starter Pack is simply a stock adapter and a Kynshot hydraulic recoil absorbing buffer; customers supply their own grip and stock.

You can read more about the Kynshot hydraulic recoil absorbing buffer in the next section.

Stock kits contain aluminum adapter, 6-position receiver extension tube (or 5-position hydraulic buffer), M4 carbine buttstock, Mesatac Trego grip, push-button sling swivel, and mounting hardware.

LEO® STOCK ADAPTERS & KITS

Our basic model, the LEO adapter, is designed with a standard stock elevation.

The LEO Gen II adapter features an M1911 pistol grip angle and is compatible with both flattop and beavertail AR-15 grips, such as the included Mesatac Trego grip.

For enhanced performance, an optional KynSHOT hydraulic recoil buffer is available, reducing felt recoil by up to 70%.

KYNSHOT® HYDRAULIC RECOIL ABSORBING BUFFER

The KynSHOT Hydraulic Buffer is available separately, buffer reduces felt recoil by up to 70%. It replaces the standard receiver extension tube and allows mil-spec carbine stocks to be used with five points of adjustment. KynSHOT hydraulic shotgun buffers cannot be used with AR-15 rifles. The RB5100 selectable damping hydraulic buffer comes with three damping settings.

SKU	System	Diameter
92240	Standard Damping	Mil-spec
91320	Selectable Damping	Mil-spec

BREACHING SHOTGUN STOCK REPLACEMENT PLUG

The Breaching Shotgun Stock Replacement Plug installs in any Mesa Tactical LEO or High-Tube stock adapter. This steel plug includes a push-button QD socket and replaces the telescoping stock receiver extension tube. Black oxide finish. Includes Mesa Tactical AR-15 Armorer and Bartender's Tool. Sling swivel sold separately.

95270	Breaching Shotgun Stock Replacement Plug

LUCY[®] STOCK ADAPTERS

STOCK ADAPTER & KITS FOR SHOTGUNS

The Lucy adapter enables 20-gauge Remington 870/1100/1187 shotguns to accept 12-gauge Remington 870 stocks. Cast steel construction allows installation of Urbino stocks, telescoping stock adapters, and KynSHOT recoil buffer systems. No gunsmithing required.

93890	Lucy Adapter	Remington 870/1100/11-87	20

TRUCKEE[®] FORENDS FOR SHOTGUNS

The Truckee M-LOK compatible aluminum forends for Remington 870 shotguns are available in three lengths: 7½, 9, and 10½ inches. The 7½-inch model fits the Mesa Tactical SureShell Carrier with Fallon Rail for the Remington 870 Tac-14.

Each forend features M-LOK slots on the sides and bottom for accessory mounting. Construction is aluminum alloy with hard anodized finish. Installation of some models requires the included forend nut wrench.

REFLEX SIGHT MOUNTS FOR SHOTGUNS

These are CNC machined aluminum mounts for pistol-style reflex sights. RMR-compatible carriers position reflex sights to co-witness with factory ghost ring sights. These models come in 4- and 6-shell configurations for Beretta 1301 Tactical, Beretta A300, Benelli M2 Tactical, and Benelli M4 shotguns.

The mount accepts Trijicon RMR/SRO, Holosun 407C/507C/508T, Riton X3 Tactix PRD and other RMR footprint compatible reflex optics.

SURESHELL[®] SHOTSHELL CARRIERS

Mesa Tactical's SureShell carriers have been setting the benchmark for professional-grade on-gun shell carriers since their introduction in 2005. Widely recognized and imitated within the industry, these carriers are a testament to Mesa Tactical's commitment to quality and innovation.

During 2025, we'll celebrate a significant milestone: shipping our 250,000th SureShell carrier.

Each SureShell carrier incorporates a rubber friction retention system for secure shell holding. Primary construction uses aluminum alloy with hard-coat anodizing. Polymer versions combine an aluminum backplate with a glass-filled nylon yoke to reduce weight.

Side-mount carriers attach using steel fasteners that replace the trigger pins. The design preserves serial number visibility on most platforms.

SURESHELL[®] CARRIERS WITH INTEGRATED PICATINNY RAIL

Rail-integrated versions include a MIL-STD-1913 Picatinny rail for optics mounting. Most shell carriers mount to the top of drilled and tapped receivers, though standard Remington 870 shotguns use a saddle style mount. Full-length rails require a barrel clamp to support the front of the rail, which may be included in the kit.

SURESHELL[®] CARRIER

WITH INTEGRATED REFLEX SIGHT MOUNT

Reflex SureShell carriers are designed to accept pistol-style reflex sights and are compatible with RMR-style optics. They position the reflex sight to co-witness with factory ghost ring sights. Available in 4- and 6-shell configurations, these mounts fit the Beretta 1301 Tactical, Beretta A300, Benelli M2 Tactical, and Benelli M4 shotguns. Compatible optics include the Trijicon RMR/SRO, Holosun 407C/507C/508T, Riton X3 Tactix PRD, and many other RMR-compatible reflex sights.

STOCK-MOUNT SURESHELL CARRIERS

Stock-mount SureShell carriers are designed for specific applications. Models exist for Urbino Tactical stocks with cheek risers and various AR-15 buttstocks. The latter SureShell carriers can be attached to M4 Carbine stocks; supplemental hardware can be purchased to support additional stocks such as those from Magpul and B5 stocks such as those from Magpul and B5.

PRODUCTS FOR AR-15 AND OTHER RIFLES

Mesatac is Mesa Tactical's brand for rifle accessories and tools.

FARO® STOCK ADAPTER

The Mesatac Faro Stock Adapter converts FN SCAR rifles to accept any AR-15 stocks (rifle or carbine).

The adapter matches AR-15 stock-to-rail height for optics compatibility. Investment cast aluminum construction comes in black or FDE finishes. Steel ambidextrous push-button sling attachment points are integrated into the design.
